Att'y Dkt. No. US-159

U.S. App. No: 10/716,253

IN THE CLAIMS:

Kindly rewrite Claim 1 as follows, in accordance with 37 C.F.R. § 1.121:

1.(currently amended)

A method of purifying L-glutamic acid by transformation recrystallization which method comprises—comprising maintaining crude crystals of L-glutamic acid containing α crystals of L-glutamic acid in an aqueous solvent as a slurry at a temperature of from 50°C to the boiling point of said aqueous solvent in the coexistence presence of active carbon until about 30% or more of the said crystals of L-glutamic acid have been transformed into β crystals thereof, the amount of said aqueous solvent being an amount not more than the amount sufficient (i.e., an amount insufficient) to form a saturated solution of said crystals of L-glutamic acid the amount of said aqueous solvent being that which forms a saturated solution of said crystals of L-glutamic acid.
